DIV. OF OIL, GAS & MINING

7/17/08

Dear Paul;

I mailed in my response to the UDOGMs request for more information on MY NOI for the Carnotite West mine S150097 but I left out these photographs of the proposed disturbed area. Please put them with the request for variance in the NOI.

Photos #1 through #3 were in the NOI, but I have included them here.

Photo #1 Shows vegetation that has established itself on existing waste rock dumps

Photo #2 " " "

Photo #3 Shows the total lack of vegetation on the surrounding Brushy Basin natural rock formations.

Photo #6 Shows the lack of vegetation on the Sand Wash formation sandstone on the west side of the proposed disturbed area.

Photo #7 Shows the SW corner of the proposed disturbed area with one of the steel post set out to mark the mine site as required by UDOGM.

Photo #8 Shows Vegetation on existing waste rock dumps in the foreground and the lack of vegetation on the shale and clay in the background.

Thank You,

Ted Thompson
